Hot Springs, AR 71913
LUPUS is one of the cruelest, most
mysterious diseases on earth-it strikes
without any warning, has unpredictable,
sometimes fatal effects, lasts a lifetime
and has no known cause and no known
cure. It is more pervasive than people
thin, and impacts people on a scale
that the public does not realize. People
like you are now becoming aware of
how urgently resources are needed to
fight lupus, and to help those who suffer
from it. We need you to join the fight to
help us find a CURE for this cruel disease
an end the devastating impact on so
many lives.

*Events held in conjunction with the
Arkansas Department of Health-Office
of Minority Health & Health Disparities
with funding through the National
Association of State Offices of Minority
Health's LEAP: Lupus Education &
Awareness Program."
